

Double Gang Surface Interface Plate, shallow (20mm)

Part No. **NCP-25**

Overview

- Allows standard UK double gang plated products to be fixed to most European style back boxes (square and round variants).
- Adapts to most European fixing centres - see video for further details.
- Multiple variants available - options include single gang shallow (NCP-23), single gang deep (NCP-24), double gang shallow (NCP-25) and double gang deep (NCP-26).
- Designed to match C-TEC's existing plastics and colours.
- Tough and durable.
- Can also be surface mounted directly to a wall.
