

# Multiple channel radio transmitter

The 703 is a four channel radio transmitter that can be used in conjunction with any wired detector or device to provide a radio solution when wiring is not possible.

Capable of transmitting signals from up to four locations, it's ideal for communicating with a central control point. And whether you need it to monitor lights, doors, pumps, machines, plant or farm machinery or other equipment, you'll find our 868 MHz narrow-band ensures reliable operation.

Moreover, it can work with wired vibration sensors to detect attacks on doors, windows, walls and safes. Likewise, by using it with a keyswitch it can act as a simple alarm system.

Powered by either 12vDC or batteries, the 703 can just as easily be used for outbuildings with no electricity as indoor locations.

However, you use it though, you can expect the 703 to perform to the highest standards to keep you informed.

## At a glance:

- Reliable Scantronic 868 MHz narrow-band radio operation
- Programmable supervision signals for extra protection
- Programmable options to cater for a wide variety of uses
- Can function as a simple alarm system + transmitter
- Integral analyser for connection of external inertia sensors
- Accepts up to four signals from a wide variety of monitoring triggers
- 12vDC and/or 2 x AA alkaline battery powered

*Powering Business Worldwide*

# Scantronic product data sheet

## Product specification

Product Code	703rEUR-00
Power supply	12vDC and/or Quiescent current 15mA
Operating temperature	-10°C to +55°C
Radio frequency	Operating frequency 868.6625MHz at 20kHz bandwidth. CE tested to I-ETS 300 220
Environmental	Environmental grade II
Battery type (LOV)	1.5V AA lithium
Enclosure material	Plastic
Typical battery life	2 Years (30 days in Modes 7 and 8)
Programming display	Two by seven-segment LED. Visible with case open
Supervision interval	Programmable 4 or 29 minutes
Dimensions	152 x 104 x 30 mm (H x W x D)
