Relay cards

The 8600 relay expansion card is designed to fit a range of Eaton security equipment converting transistorised outputs to clean contact relay outputs. This card contains eight relays, each with its own dedicated input.

The i-RC01 relay card is used with i-on control panels and expanders to convert the four on board transistorised outputs to clean contact relays. The relay card uses screw-free mountings specifically designed into these products for this purpose. Also fits into preformed clips in expander housing.
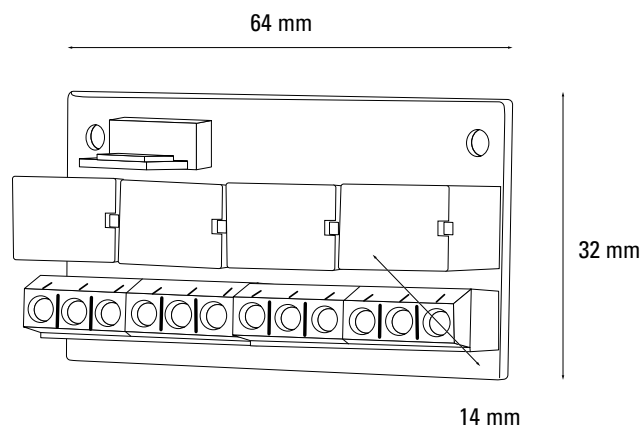

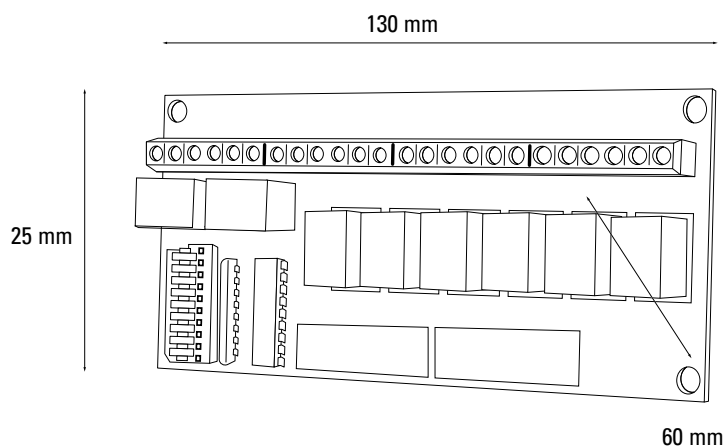

At a glance...

- Rated at 1Amp
- Supplied with ready-terminated connecting cables
- Can be fitted to both wired and radio control panels
