

Expandable 200 zone control panel

Built with cyber security in its DNA the i-onG3MM is SecureConnect™ Cloud and App enabled

Decimal expansion system

It provides 25% more zones per expander than traditional 8 zone expanders. Expanders have 10 zones in addition to the 10 zones on the end station. This makes it easy to locate zones and reduces the total number of expanders required. A 30 zone radio expander is also available.

Performance bus

2 buses with flexibus to provide maximum installation flexibility. Connect expanders and keypads to any bus and address them as though there was only a single bus. Maximum of 50 bus devices.

Semi-auto addressing

Prevents address duplication for bus mounted devices, saving hours of installation diagnostic time.

Audible bus device tracing

Locate any bus device quickly and easily. Reduce the time taken to complete maintenance and service calls.

At a glance...

- SecureConnect enabled
- Range of keypad options
- App for end user control and notification
- Common programming across the range

Product specification

Product code	i-onG3MM
Compliance	EN50131 PD6662:2017 Grade 2 or 3
Zones on board	10
Total zone capacity	200
Total number of buses	2 - Flexibus
Number of users	200
Number of outputs	200 plus 16 communicator
Maximum number of partitions	20
Number of part sets per partition	3
Power supply	2A
Battery (maximum capacity)	1 * 17Ah
Temperature range	Environmental class 2 -10°C to 55°C 93% RH
Weight	4.5Kg panel without battery
Remote communications	Ethernet included. Choice of plug on communicators for PSTN, GSM or 4G
Communications security	SSL/TLS - when communicating with SecureConnect™ App or Cloud
Dimensions	320mm (h) x 402mm (w) x 102mm (d).
